

HUE HD Pro Camera

FOR CLASSROOM AND ONLINE LEARNING

The HUE Camera offers a cost effective alternative to a standard classroom document camera.

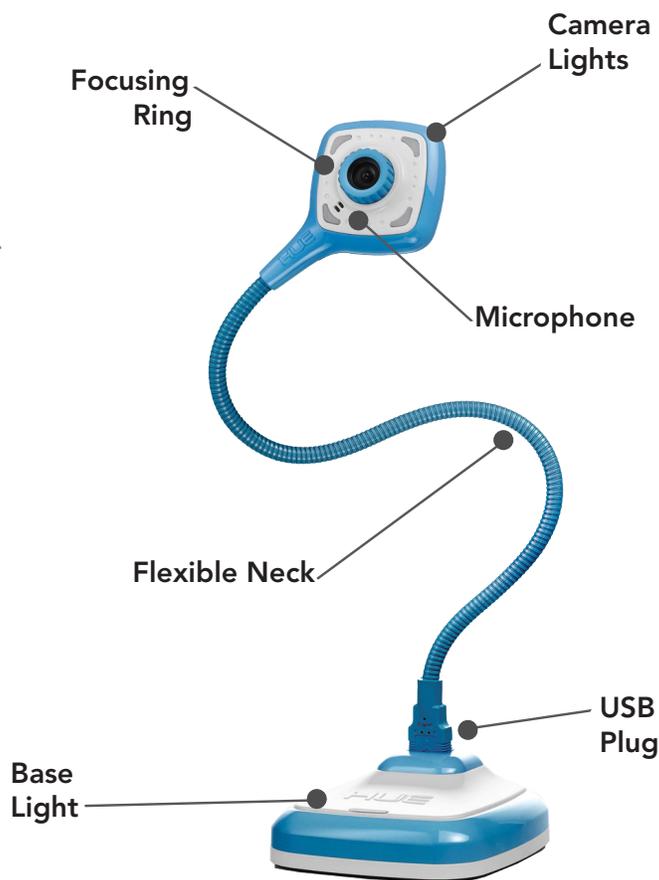

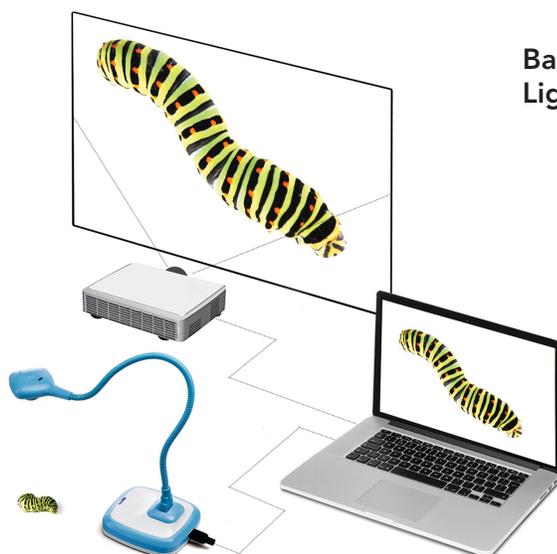

Simple to set up and easy to use, your visualizer soon becomes part of your day-to-day teaching. There are so many ways to use it such as live modeling, peer editing, showing demonstrations and experiments and sharing students' work. You can also prerecord parts of your lesson and share them again as a revision exercise later in the year.

The camera has a built-in microphone and small footprint, and it is also highly portable, making it easy to move from classroom to classroom and also to teach from home.

Shown in blue, colors may vary.
