NoodleTools: Full-service classroom environment for the research process

Integrated tools to support authentic research and original writing, paired with online teaching units and offline expert assistance. High-quality, best-practices support for your classroom: **designed by educators, for educators**. Our process feels natural and intuitive, scaffolding the way you already teach. And no online advertising, ever. NoodleTools works with all recent browsers and is fully iPad-accessible.

Differentiated Learning

There are three levels within NoodleTools -- Starter, Junior, and Advanced -- designed to match the expertise of your students as they grow from novices to independent scholars. At each level, we've built in appropriate advice for identifying, evaluating and citing sources. Use the version that's right for your classroom, individual student, or subset of learner (ELL/ESL, gifted, AP, LD, etc.). School districts subscribed to NoodleTools benefit by sharing a common framework for teaching and learning the research process, across multiple grades and transitions between elementary, middle and high school curricula. All NoodleTools teaching modules incorporate common core concepts.

How does NoodleTools Work?

Teacher environment and support: A teacher or group of teachers can set up an assignment inbox to monitor students' progress in real-time, manage the paper trail, and provide feedback. Comment directly into student work (citations, notecards, and general project feedback) and respond to students' questions. Generate charts that illustrate the balance and quality of sources in a student's source list. Assign NoodleTools teaching modules to reinforce comprehension.

Note taking and outlining: On the Notecard Tabletop, students create, tag, pile and link notecards in ways specifically designed to make connections, develop original ideas and articulate arguments. Click and drag notecards into piles to suggest subtopics, then into your outline to organize your ideas in preparation for writing. Notecards are visibly linked to source information, preventing accidental plagiarism.

Source evaluation and citation generation: Generate accurate citations in MLA, APA, and Chicago formats. "Show Me" online teaching modules guide students through the process of identifying source types and recognizing relevant and credible information. Directly import citations from a growing number of library subscription databases.

Group collaboration: Any number of students can work on a project simultaneously from different locations and view each other's changes in real time. As you review a collaborative project, notecards and citations are labeled with the name of the student that authored them.

Single-sign-on (SSO): Schools and districts can choose to use **Google, Microsoft 365, Clever, or ClassLink SSO** for authentication into NoodleTools, eliminating the need to manage student accounts separately.

Trials, Ordering and Access

Trial accounts are available. You may submit a trial request at:

http://noodle.to/trial

Subscription access is available via:
- Single-sign-on (SSO) via Google, Microsoft 365, Clever, or ClassLink
- username/password
- on-campus IPs
- proxy server
- referring URL

All subscriptions include remote access.

To start a new subscription, a school can refer to the steps here:

http://noodle.to/howtosubscribe

To renew an existing subscription, the account administrator should log in to the school's subscription management area and submit a renewal request (e-mail us if you have lost your administrative username/password):

https://my.noodletools.com/support/

A sole source letter is available online:

http://noodle.to/solesource

2022-23 Pricing

AEA members receive a **20% discount** off of standard academic pricing. Cost per year is tiered based on the student enrollment at the school (or FTE at the college). District license discounts are available when all middle and high schools in a district are participating. AEA members can request a quote for a school or college at https://www.noodletools.com/request-a-quote/ (be sure to let us know you are a member of AEA in the "Comments" area).

Usage Statistics

Real-time usage statistics are available online through the administrative area of the site.
