24/7 Emergency Response

Are You Prepared?

What if today an Emergency or Disaster impacted your ability to provide services or products to your customer?

- Do you have an **“Emergency Response Plan”** to protect your assets (physical, technological, human)?
- Do you have a **“Crisis Communications Plan”** to inform or warn your employees, customers, or vendors during a disaster?
- Do you have a **“Continuity of Operations Plan”** that prioritizes your critical function and service restoration?
- Do you have a **“Disaster Recovery Plan”** to protect your data and technology services?
- Do you have a **“Resource Management Plan”** that identifies on-site resources, as well as, key vendors that support your company during crisis?
- Do you have an **“Employee Training Plan”** that identifies critical employee roles and training requirements within the organization?
- Do you have a trained **“Crisis Management Team”** that can implement your response, and recovery plans?

Training and Exercises

Our trainers are all experienced and credentialed professionals that can provide your team with a state-of-the-art training experience. Our programs meet all industry standards and come with a certificate of completion for each course or seminar.

Some of the training we can offer:

- Computer Security for Employees
- Risk Management
- First Aid/CPR/AED
- Bloodborne Pathogens
- Incident Management/Command
- Lockout/Tag Out
- Fire Suppression System Malfunction
- Hazardous Materials (HAZWOPER)
- Confined Space
- Emergency Response Team/Industrial Fire Brigade
- Employee Safety
- Active Shooter/Behavioral Emergencies
- Plan Testing and Exercising
- Other as requested...

Risk Assessments

We can work with your team to assess its risk and preparedness by conducting an assessment of your organization threats, gaps and vulnerabilities. For each assessment we will provide a complete report of findings and recommendations for reducing your organizations vulnerabilities.

A few of our available assessments:

- Business Impact Analysis
- Hazard Vulnerability Assessment
- Physical Security Assessment
- Gap Analysis of Current Emergency Plans

Risk Rating = Likelihood x Severity

Severity	Likelihood	Risk Rating				
		1	2	3	4	5
S e v e r i t y	Catastrophic	5	10	15	20	25
	Significant	4	8	12	16	20
	Moderate	3	6	9	12	15
	Low	2	4	6	8	10
	Negligible	1	2	3	4	5

Legend:

Catastrophic	STOP
Unacceptable	URGENT ACTION
Undesirable	ACTION
Acceptable	MONITOR
Desirable	NO ACTION

Likelihood Legend:

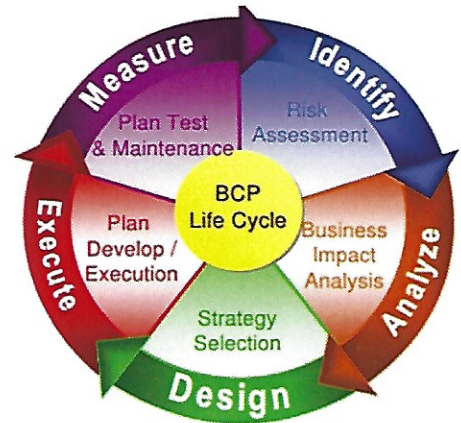

1	2	3	4	5
Improbable	Remote	Occasional	Probable	Frequent

Emergency Response & Disaster Planning

Why Plan?

Most organizations have either a standard or requirement for emergency and disaster planning, they just don't know where to begin. The Small Business Administration states on their website that, "An estimated 25 percent of businesses don't open again after a major disaster." Former FEMA Secretary James Lee Witt stated, "For every dollar spent on preparedness five dollars is saved on future losses."

***"Signal Tactical is Your Disaster Resilience Partner!
Let us work with you to assess, plan, train, test, implement,
and maintain your organizations disaster resilience."***

Our team of professionals has years of experience in planning, responding, recovering/restoring, and mitigating emergencies and disasters.

What is an Emergency Response Plan (ERP)? Organizations require both a planning and action document that is easily accessible to all members of the organization. The contents of an ERP include: facility information; maps and floor plans; on-site emergency equipment; emergency notification information; analysis of facility hazards; employee training and plan testing requirements; emergency contacts; and core plans (fire, severe weather, active shooter, etc.).

What is a Crisis Communications Plan? During a crisis, organizations need to communicate with employees, customers, suppliers, vendors, and key stakeholders. A Crisis Communications Plan provides scripted messages that are timely and actionable tailored to a specific audience on specific platforms such as email, texts, voicemails, and social media. Messaging is key to protecting and managing your organization during an emergency.

What is a Continuity of Operations Plan (COOP)? May also be referred to as a Business Continuity Plan (BCP), or Continuity of Government Plan (COG). After identifying essential functions within your organization, a COOP provides continuity processes and objectives to maintain continuity within your organization until full restoration is achieved.

What is a Disaster Recovery Plan (DRP)? Organizations cannot stop a cyber-attack but with planning the effects of the attack can be minimized. A DRP establishes consistent security actions to protect your information technology before and after an attack based on industry standards.

What is a Resource Management Plan? It's not when the emergency is happening that you want to have an inventory of on-site resources or vendors that can provide the timely resource, having a plan with identified resources, contracts and agreements is critical. A Resource Plan allows you to identify and plan for the acquisition of the correct resource when you need it.
