

SOTER
TECHNOLOGIES

STUDENT SAFETY COMES FIRST.

Quill Cares about the safety of the students in your school. We have recently partnered with Soter Technologies to bring you FlySense™, the leader in real-time vape detection™. Through decibel level readings, this product can also detect bullying type situations happening in your school.

WANT A VAPE-FREE CAMPUS?

When FlySense™ detects vaping or sound anomalies caused by bullying, a zero-delay, location-specific alert notification is sent by SMS or email to designated school officials.
