If 90s tech had remained the norm...

We'd have a bunch of fly search engines that are all that!

Our cell phones would still be ginormous (and possibly in a bag!)

And we'd be saying things like 'Talk to the hand', 'Booyah' or 'Da Bomb'!
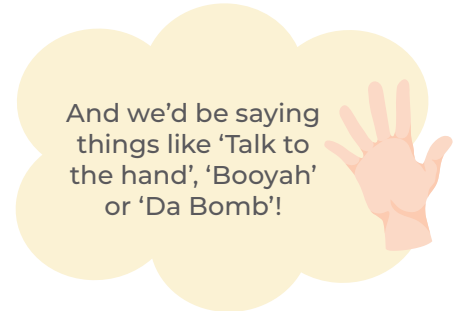

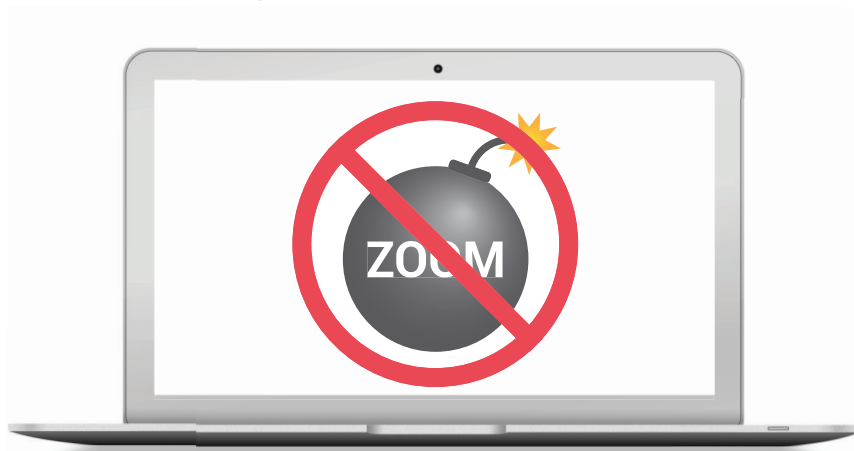

1990s

...then you can't combat Zoom Bombing

The internet has changed a lot since the 90s. Your web filter hasn't.

"We are charged with the well-being of students so we decided to use Deledao to monitor their mental well-being. The reporting is very good and lets us know when children are considering self-harm or if there is cyberbullying activity. Now we can get them the help they need. Our school principal is very happy with the product.

" As a district with over 11,000 students, we wanted a few things. One, a content filter that finally works on our Windows devices, not just on Chromebooks. Second, a solution that works off campus for distance learning. Deledao delivered on all its promises and more. It's probably the best thing we bought this entire year.
