

PROJECT PROFILE

SCHOOL DISTRICT

In 2018, Hurricane Michael made landfall along the Florida Panhandle as a Category 5 storm. Several schools in this district were devastated from 160 mph winds and storm surges recorded up to 14 feet.

Blackmon Mooring & BMS CAT were tasked with restoring nine campuses throughout the area. To tackle these projects, we mobilized over 700 temporary workers each day. Our team rose to the challenge and had all of the schools back in session within 30 days.
